WANT TO REDUCE BLOOD SUGAR, A1C, WEIGHT AND MEDICATION?

Following the food list above will help you get started toward achieving optimal results. For the best help and support to reach your goals, [JOIN US AS A MEMBER](#). It will be the best decision you ever make!

"I have to say thank goodness for DMP. When I found you my husband's A1C was 8.5, a few months later, his A1C is 5.8. I have found your service to be a lifesaver." ~**Vicki**

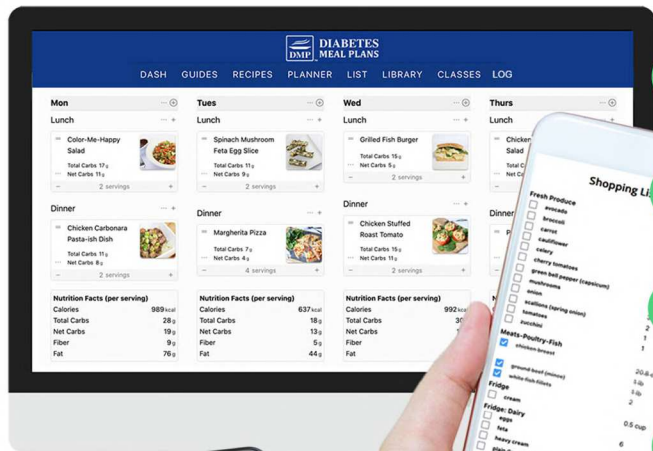

"My weight dropped 6 pounds (2.7kg), and my A1C dropped to 5.8! This was an all-time low for me. Best of all, my doctor reduced my daily amounts of metformin and glipizide by half. Four years on: at 70 years old, my HbA1C continues to be under control. I maintain lower medication." ~**Sheryl**

"I lowered HbA1c by 1.3% in 16 weeks, and my last three readings have been in the normal range, 5.6, 5.7 and 5.8. I'm almost off all medications now." ~**Dean**

DR JEDHA & THE DMP TEAM SHOW YOU HOW TO EAT TO TREAT DIABETES

Access Dr Jedha's scientifically proven T2Diet Program to reduce A1c, weight and medications in as little as 16 weeks

Receive delicious weekly meal plans and recipes to remove confusion from your eating plan and stay on track

Track your blood sugar levels and health progress and access proven resources that help you maximize results
